KNOWLEDGE CREATES
FUTURE

SEHO Wave Academy
October 7, 2025

SEHO Selective Academy
October 8, 2025

SUCCESSFUL PRODUCTION BEGINS WITH AN EDUCATED EMPLOYEE

In such a dynamic industry as electronics production, it is important to continuously improve employee knowledge. Which will ensure the highest quality of production and reduced manufacturing cost. The SEHO Academy provides this foundation.

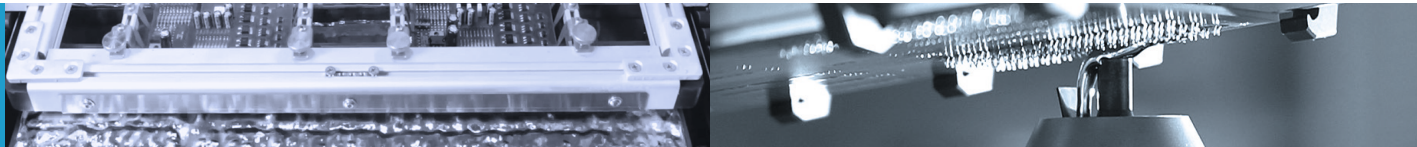

Our educated and experienced trainers with many years of practical experience will discuss the soldering process for selective, wave systems and equipment preventative maintenance. This information will help you in the optimization of your wave or selective soldering process.

Our October seminars are perfectly complemented by insightful presentations from Alpha, KIC and South-Tek Systems.

Whether in our modern Technology Center or at your factory:

The SEHO Academy provides more for You.

- **AOI Seminars:** Tailored to your specific needs.
- **Ramp-Up Service:** The optimum start with your new SEHO soldering system.
- **Process Optimization:** Soldering advice onsite at your production floor for your specific process.
- **Process Evaluation:** Profit from our know how and our equipment. We evaluate for you your new processes at our soldering systems in the SEHO Technology Center.
- **Customer-Specific Trainings:** At your factory, at SEHO Germany, at SEHO North America or at SEHO China.

SEMINAR WAVE SOLDERING

This one-day wave seminar provides comprehensive theoretical and practical training on the wave soldering process. Participants will explore key process parameters, learn to identify and correct common soldering defects, and gain valuable tips for optimizing soldering results. A strong focus will be placed on the importance of machine conditions, with practical instruction on effective maintenance to improve solder quality and reduce production costs.

In addition, attendees will be trained in the professional use of software and analysis tools to enhance system performance. Hands-on sessions with the PowerWave system with PC control ensure practical experience with all critical system components.

Date: October 7, 2025 **Registration Fee:** 350.00 \$
8:30 a.m. - 4:30 p.m. Seminar no. DL 4200 045

This one-day selective seminar offers comprehensive training on the selective soldering process, including an overview of different methods, key process parameters, and common soldering defects with strategies for optimization. This part of the seminar delivers general and applicable knowledge for all users. A major focus is placed on machine precision and the role of regular maintenance in improving soldering quality.

Through extensive practical exercises, participants will gain hands-on experience in handling all parts of a selective soldering system. Dedicated sessions are available for PowerSelective and SelectLine systems. Additionally, the seminar covers the Offline Teach Program (OTP 2), used across SEHO selective soldering systems.

Date: October 8, 2025 **Registration Fee:** 350.00 \$
8:30 a.m. - 4:30 p.m. Seminar no. DL 4200 046
