

SEHO ACADEMY

KNOWLEDGE CREATES

FUTURE

Seminars,
gained in **Practice**
for use in **Practice**.

WELCOME TO SEHO ACADEMY

Successful production begins with an educated employee

In such a dynamic industry as electronics production, it is important to build up and continuously improve know-how. This will help to ensure production at highest quality level and simultaneously reduce manufacturing cost.

The SEHO Academy lays the foundation for this. Our competent and experienced trainers with many years of practice provide their knowledge in intensive seminars about the soldering processes, the operation and maintenance of machines. Such expertise can then be directly implemented in your own production:

To optimize processes, reduce cycle times, increase machine availability, thus reducing overall manufacturing costs.

ADVANTAGES OF THE SEHO ACADEMY

The efficiency of the SEHO training courses is based on a simple principle: To provide a perfect balance of theory and practical application.

OUR GOAL

To help you increase the quality level of your production process and decrease manufacturing cost, thus enabling you to realize a higher level of profitability.

SEMINAR MAINTENANCE OF WAVE SOLDERING SYSTEMS

The quality of solder joints in the wave soldering process in many cases depends on the condition of the machine. Therefore, an effective and regular maintenance of the soldering system provides a basis for remarkable quality improvements at simultaneously reduced production costs.

The participants learn directly in practical application experienced handling of all components of the machine.

This seminar will focus on the wave soldering systems MWS 2300 and PowerWave N2.

Who should attend:

Maintenance personnel and production personnel.

Duration: 1 day**Registration Fee:** 960.00 €

8:30 a.m. - 16:30 p.m. Seminar no. DL4100 053

SEMINAR THE WAVE SOLDERING PROCESS

This one-day seminar will impart comprehensive theoretical knowledge about the wave soldering process and its parameters. In addition, typical wave soldering defects will be reviewed and possible corrective actions being discussed, and the participants will receive helpful tips for optimizing the soldering results.

This seminar is independent from the machine type and provides general know-how.

Who should attend:

Production personnel in THT productions, process control, quality control.

Duration: 1 day**Registration Fee:** 960.00 €

8:30 a.m. - 16:30 p.m. Seminar no. DL4100 054

SEMINAR SOFTWARE WAVE SOLDERING SYSTEMS

This seminar will enable you to handle the key elements of the software professionally and to use the analyzing tools, thus improving the overall performance of the wave system.

The seminar will focus on MWS 2300, PowerWave N2 as well as PowerWave with PC control unit.

Duration: 1 day**Registration Fee:** 960.00 €

8:30 a.m. - 16:30 p.m. Seminar no. DL4100 063

SEMINAR MAINTENANCE OF SELECTIVE SOLDERING SYSTEMS

The main criterion in selective soldering processes is the precision of the machine. An effective and regular maintenance often provides a basis for considerable quality improvements. Attendees will learn an experienced handling of all parts of a selective soldering system.

This maintenance training consists of an extensive practical part. Due to the machine-specific differences we offer separate dates for the PowerSelective and SelectLine (other machine types on request).

Who should attend:

Maintenance staff and production personnel for selective systems.

Duration: 1 day**Registration Fee:** 960.00 €

8:30 a.m. - 16:30 p.m. Seminar no. DL4100 056

SEMINAR THE SELECTIVE SOLDERING PROCESS

This one-day seminar will provide comprehensive knowledge about the selective soldering process and its parameters. Different selective soldering methods will be considered as well as process-related soldering defects and options to optimize the process.

This seminar is fully independent from the machine type in use and provides general know-how.

Who should attend:

Assembly staff for selective soldering processes, process control, quality control, technologists.

Duration: 1 day**Registration Fee:** 960.00 €

8:30 a.m. - 16:30 p.m. Seminar no. DL4100 055

SEMINAR SOFTWARE / OTP 2

This seminar is designed to give you an excellent understanding of the structure and functions in the Offline Teach Program OTP 2, that can be used with all selective soldering systems from SEHO. Practical exercises, online teaching and optimization at the machine ideally complete this seminar.

Number of participants is limited to 6 persons.

Duration: 1 day**Registration Fee:** 960.00 €

8:30 a.m. - 16:30 p.m. Seminar no. DL4100 060

SEHO ACADEMY- MORE FOR YOU

Whether in our modern and fully equipped Technology Center or at your factory:

The SEHO Academy provides more for you.

- **AOI Seminars:** Tailored to your specific needs, from setting up test programs to optimization of test parameters at your AOI system from SEHO.
- **Ramp-Up Service:** The optimum start with your new SEHO soldering system.
- **Process Optimization:** Soldering advice onsite at your production floor for your specific process. The content of such training is individually adapted to your specific requirements and may cover topics such as optimization of the soldering process or manufacturing sequence, reduction of soldering defects or improvement of the first pass yield.
- **Process Evaluation:** Profit from our know-how and our equipment. We evaluate for you your new processes at our soldering systems in the SEHO Technology Center.
- **Customer-Specific Trainings:** At your factory, at SEHO Germany, at SEHO North America or at SEHO China.

YOUR ADVANTAGES

- Improved process stability in your production.
- Cost reduction due to higher efficiency of your employees and increased reliability of your processes.

Participation Fee / Scope of Services:

The participation fee per person is 960.00 € for a one-day seminar. Please note that German fiscal law requires to add 19 % VAT.

Price includes comprehensive seminar materials, a personal certificate of participation, and refreshments.

A 5 % discount will be applied to the total price if two training days within one seminar block are booked at the same time. If all training days within one seminar block are booked, the total price will be discounted by 10 %.

Please note that seminars will only take place if a sufficient number of participants register.

Profit from the know-how of our experts:

Especially our seminars about soldering processes are absolutely independent from the machine type, used in production.

We will be happy to create an individual offer for you and inform you of the available seminar dates.

Simply use our online inquiry form or contact us at **academy@seho.de**.
